

Certificate of Accuracy*

A customer requesting a Certificate of Accuracy, needs proof that the nominal values represented by the mass in question have been designed and manufactured to within exacting specifications.

The Certificate of Accuracy provides just such a document when and where traceability to NIST, and/

or the need for a NVLAP accredited document is not a concern. The Certificate of Accuracy is the lowest level of documentation offered by Rice Lake Weighing Systems. Check with your internal procedures and policies to determine what type of documentation you require

and thoroughly review the RLWS Traceable Mass Value Certificate, TMAP Traceable Certificate, and TMAP Calibration Certificate options prior to selecting this laboratory documentation.

The Certificate of Accuracy includes the following information:

- 1 Name and address of the company that adjusted the weights
- 2 Part number
- 3 Description/Serial number
- 4 Tolerance for the specific class
- 5 Name and address of company that items were sold to
- 6 Name and address of company that items are shipped to

*Only applicable to new weights.
Not a legal-for-trade or traceable document.
